Learn about all the ways you can make your home accessible

What Our Customers Have to Say

"I selected this company based on previous reviews. These folks went the extra mile to expedite the installation of two chairlifts for my father. The installation was fast and clean. The chairlifts are smooth and easy to use. Accessible Systems are my go to guys for any future access needs!"

"I just have to let you know how much this lift has changed our lives. I use to have to go home from work at least 3 times a day. Now I go at lunch time and just fix his lunch. He has his freedom back and it makes a huge difference for him and for me. Thanks so much for your excellence advice and service."

– Margaret Waldram

"The Team at Accessible Systems were amazing from start to finish! I stressed the need for a functional walk in shower that did not look clinical nor hospital like. Troy, who is a master craftsman, took an ordinary tub & shower stall & transformed it into the most beautiful spa-like walk in shower with fabulous shelving & flooring. Troy was professional, prompt and never left a mess! The finished product is perfect and exceeded all expectations!"

–Karen Stella

"Great company! Reliable service, trusting and good quality."

– Bradley Belcher

"They were professional, personable and very accommodating. Our installer was very thorough and did a good job and went through the instructions on how to use it after he was finished. We are happy with the whole experience."

– David Ottem

"We needed a stairlift, so we started with Acorn. They called us endlessly and took a very hard sell approach. Then I looked at Ameriglide, I was curious about the self installation- but they had terrible reviews and many safety concerns. Then we went and looked at Stannah and Harmar lifts. Their stairlifts were loud and felt unsafe; the staff was not knowledgeable about their own products. After speaking again with Kate on the phone from Accessible Systems, they were extremely knowledgeable about their products. I noticed a significant difference in quality between the lifts we had looked at at other places. Jon, the technician, was very professional and polite throughout the installation. I am so glad we decided to go with a Bruno stairlift through Accessible Systems."

– Marvin Isaac

"We are very happy with everything and the installers were great to work with. I felt like they were both conscientious and genuinely concerned that things were installed correctly. I feel better about Doug moving about the house safely. We appreciate the extra effort by staying until the job was finished. Thanks for a great install!"

– Carol Montgomery

They know what they're doing and when it comes to customer service, they go above and beyond!

– Becky Coombs

SHOWERBUDDY SB1

ShowerBuddy SB1

The ShowerBuddy SB1 shower transfer system will turn your existing bathroom into an accessible bathroom that allows you to enjoy showering again without the excessive cost, delay and stress of a full bathroom remodel.

The ShowerBuddy SB1 alleviates heavy lifting and multiple transfers for toileting and showering. This chair is separated into three sections; rolling base (shower chair), bridge and shower base. The rolling base rolls around the house like a wheelchair allowing patient to easily transfer and then roll right over a toilet (certain toilets).

Once completed with toileting, the rolling base can connect to the bridge and then onto the shower base allowing the chair to slide into the shower. Once inside the shower, the bridge disconnects and the shower base turns allowing the user to face the shower controls.

The Showerbuddy system is made of aluminum which will not rust or corrode when in contact with water. Height adjustability on rolling base and shower base- allowing for use in a variety of shower stall sizes. Rolls over some toilets- allowing for "no mess" alternative to commode usage. Custom bridge sizes are available- allowing for use in a variety of bathroom sizes.

TUBBUDDY SB2

Tubbuddy SB2

The TubBuddy SB2 transfer system will turn your existing bath tub into an accessible bathroom that allows you to enjoy showering again without the excessive cost, delay and stress of a full bathroom remodel. The TubBuddy SB2 alleviates heavy lifting and multiple transfers for toileting and showering. This chair is separated into three sections; rolling base (shower chair), bridge and tub base. The rolling base rolls around the house like a wheelchair allowing patient to easily transfer and then roll right over most toilets. Once completed with toileting, the rolling base connects to a bridge and then onto the tub base allowing the chair to slide over the tub. Once over the tub, the bridge disconnects allowing the curtain to close.

- The TubBuddy SB2 system is made of aluminum which will not rust when in contact with water.
- Height adjustability on rolling base and tub base- allowing for use in a variety of tubs.
- Rolls over some toilets- allowing for “no mess” alternative to commode usage.
- Custom bridge sizes are available- allowing for use in a variety of bathroom sizes.

FOR THE TUB

SHOWERBUDDY SB2T

ShowerBuddy SB2T

The TubBuddy with Tilt SB2T transfer system will turn your existing bath tub into an accessible bathroom that allows you to enjoy showering again without the excessive cost, delay and stress of a full bathroom remodel.

The TubBuddy with Tilt SB2T alleviates heavy lifting and multiple transfers for toileting and showering. This chair is separated into three sections; rolling base (shower chair), bridge and tub base. The rolling base rolls around the house like a wheelchair allowing patient to easily transfer and then roll right over most toilets. Once completed with toileting, the rolling base connects to a bridge and then onto the tub base allowing the chair to slide in a tilt position over the tub. Once over the tub, the bridge disconnects allowing the curtain to close .

- The TubBuddy with Tilt SB2T allows the chair to tilt while transferring over the tub preventing the caregiver lifting the patients legs over the tub.
- The system is made of aluminum which will not rust when in contact with water.
- Height adjustability on rolling base and tub base- allowing for use in a variety of tubs.
- Rolls over some toilets- allowing for “no mess” alternative to commode usage.
- Custom bridge sizes are available- allowing for use in a variety of bathroom sizes.

FOR THE TUB

SHOWERBUDDY SB6W

ShowerBuddy SB6W

The Showerbuddy SB6W is our only self propelled shower chair. It features the same aesthetics as the original line of Showerbuddy products at a fraction of the cost. Showerbuddy SB6W comes with large self propelled wheels, a standard front opening cushion, swing away and removable footrest, flip back and removable armrest. An optional left, right and full round cushions along with a solid backrest is available as an add-on. The Showerbuddy SB6W is height adjustable and comes with a removable commode bucket so you can roll it from bedside to over the toilet.

SHOWERBUDDY SB6C

ShowerBuddy SB6C

The Showerbuddy SB6C features the same aesthetics as the original line of Showerbuddy products at a fraction of the cost. Showerbuddy SB6C comes with a standard front opening cushion, swing away and removable footrest, flip back and removable armrest. An optional left, right and full round cushions along with a solid backrest is available as an add-on. The SB6's is height adjustable and comes with a removable commode bucket so you can roll it from bedside to over the toilet.

BATHROOM REMODELING

Custom Bathroom Remodeling

Custom Bathroom remodeling includes everything from doors, to floors, to showers, tubs, walk in tubs, walk in shower, custom vanities, and beautiful accents. We also provide and install professional grade plumbing, shower and tub valves, sinks, and countertops. With our Custom Remodeling, you can create the home of your dreams.

We specialize in designing unique accessible bathrooms and showers that are safe, functional and attractive. Our unique process starts with a free home consultation. In most cases we can transform a standard 5' x 10' bathroom making it more accessible by removing a tub and recessing a toilet into a wall. In other cases we may take space from an adjacent bedroom or maybe closet.

Barrier-Free

Open concept bathrooms offer state-of-the-art features. With floors sloped to drains, zero threshold shower and shower doors can disappear, creating barrier-free bathrooms. Accessible showers not only create beautiful spaces, they also provide freedom and security to individuals with limited mobility, or homeowners wanting to age in place. This combination of style and accessibility provides greater value to a bathroom, where today's barrier-free bathroom built for its design, will continue to provide homeowners with independence in the future.

Who Does the Work?

All of the work is done by our full time team members who are Shluter Systems certified installers. A project manager is assigned to a project who would be in charge of communicating and making sure that the project is done on budget and time.

Walk In Tubs

Remove Obstacles and Add Independence

A Walk in Tub offers 2 important benefits for your bathing needs. First, a Walk in Tub has an easy low threshold entrance that adds safety and convenience as you enter the tub. Second, a Walk in Tub provides hydrotherapy which improves your health with heat, pain relief, and enhanced circulation.

With air and water jets, this hydrotherapy will relax your muscles and joint while reducing swelling. With a comfortable seat, easy to use handheld shower, and beautiful fixtures, your Walk in Tub will make your bathroom a spa.

Accessible Systems offers highest quality walk-in tub models. Our Walk in Tubs are an accessible bath tub that offer the therapeutic benefits of a spa. Enjoy a step in tub that provides the best of air and water jet therapy, as well as high quality construction and a full warranty.

We have 16 models that provide different sizes, different options that will fit your bathroom, and fit you.

EURO STYLE BATHROOMS

Euro Style Showers

Euro Style Showers feature an open concept floor plan with a Zero Threshold that is level with the bathroom floor. This creates a bigger bathroom and shower with custom features. Many contractors will install a shower on top of your existing floor which creates a step or barrier. After many years of experience, we have developed 2 options, our Onyx Solid Surface shower base, and our Custom Tile shower base.

Euro Style Showers feature an open concept floor plan with a Zero Threshold that is level with the bathroom floor. Many contractors will install a shower on top of your existing floor which creates a step or barrier. We have developed 2 options, our Onyx Solid Surface shower base, and our Custom Tile shower base.

43% of homeowners are choosing to forgo a tub in their bathroom.

– According to Houzz
